2008	-29.8	12.9	0.9	39.4	5.8	1.0
CAGR '72 to '08	11.5	10.2	7.7	9.9	11.1	6.5
Average '72 to '08	15.0	11.0	7.8	13.8	11.9	6.6

So, for the period from 1972 to 2008 the Permanent Portfolio method delivered the same compound annual growth rate (CAGR) as the equity portfolio but with none of the eye-watering falls. This

assumes of course that you rebalanced your portfolio to 25% in each asset at the end of each year. In fact, this method only experienced three minor down years in 1990, 1994 and 2001.
